

## Possible Future Garden Layout

- (1) Fruit orchard (in wild flower meadow?)
- (2) Afternoon/evening patio/BBQ.
- (3) Ground raises slightly here. One pole pine near wall. Plant with rock garden/bamboo/trees?
- (4) Compost area. (woodchip too?)
- (5) Small very low maintenance pond - primarily for frogs and drinking for birds.
- (6) Approx car size for scale.
- (7) Enclosed raised beds. 5 beds for rotation? Soft fruit in here too on sides.
- (8) Fence extends to house. Need double gate for occasional car entry, and easy pedestrian in/out.
- (9) This will be occasional standing for car. Gravel or durable grass??
- (10) Existing beds extended?
- (11) Decking extended to wall so enough space for sitting out (morning area).
- (12) Door from wood shed opens here.
- (13) Door from bin shed opens here.
- (14) Birch tree is here. Probably needs support against wind (currently attached to fence).
- (15) Small section of this bit of hedge is dead & has been removed.
- (16) Garden shed for lawnmower, tools etc.
- (17) Oil tank. Probably not practical to move, but long term we probably won't use oil for heating.
- (18) Currently grass and a couple of small trees. Possibly gravel for extra turning space and wood storage? Could we store wood between garage and SE wall?
- (19) Driveway - area increased at front of house to allow parking/turning at front. Tarmac or gravel?
- (20) Hawthorn tree - a bit worse for wear so probably plant another nearby and eventually remove this one?
