

## Original Garden Layout

- (1) Leylandii hedge to be removed. Plan to have stumps dug up.
- (2) Small tree (willow?) to be removed.
- (3) Greenhouse probably to be removed.
- (4) Side door from garage opens here.
- (5) Small apple tree - will keep but may need to move?
- (6) Pond will be removed & filled in.
- (7) Old plum tree to be removed (inc stump).
- (8) Holly tree to be removed (inc. stump).
- (9) Poplar tree to be removed (stump left in place).
- (10) Some plants here we would like to keep (esp nice hydrangea), but open to moving them.
- (11) Small tree here probably needs (re)moved if greenhouse removed?
- (12) Door from wood shed opens here.
- (13) Door from bin shed opens here.
- (14) Lawn area probably convert to car turning/parking.
- (15) Small section of this bit of hedge is dead & has been removed.
- (16) Gas inlet for kitchen. Need to store gas bottles in this general area (but could be (ideally) other side of fence). Long term we won't use gas.
- (17) Oil tank. Probably not practical to move, but long term we probably won't use oil for heating.
- (18) This section of decking alongside pond will probably need removed once pond is removed.
- (19) Large gas tank currently here on concrete base. This will be removed.
- (20) Hawthorn tree - a bit worse for wear so probably plant another nearby and eventually remove this one?
